

- FULL 5-YEAR WARRANTY

Who Is Covered, And For How Long?

Our warranty covers any consumer who owns this product. It lasts 5 years from the date the first consumer purchased this product as new.

What Does The Warranty Cover? And What Does It Not?

- It covers defects in materials or workmanship. It does not cover defects caused by accident, animal attacks, neglect, normal wear and tear, improper care, or failure to follow our written directions (available on our website at www.aquapac.net).
- It does not apply if examination or testing show that an alleged defect does not exist.
- **It covers this product only, and not any items you may put inside this product. WE WILL NOT BE LIABLE FOR THE COST OF REPAIRING OR REPLACING ANY SUCH ITEMS OR FOR ANY OTHER INCIDENTAL, CONSEQUENTIAL, SPECIAL, OR OTHER DAMAGES. SOME STATES AND TERRITORIES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.**

What Will We Do To Correct Problems?

We will repair any product that proves to be defective in materials or workmanship during the warranty period. In the event repair is not possible, we will either replace it with a new one or refund the full original purchase price - whichever you prefer. We will also reimburse you for any shipping charges we ask you to incur in returning any product that proves to be defective. This is our only express warranty, and this is our entire obligation, and your sole remedy, for any defects. In no event will we be responsible for reimbursing you for any amount greater than the original purchase price, plus any covered shipping charges.

How Can You Get Warranty Service?

You will find clear instructions on our website at www.aquapac.net. Look for the link to **Customer Service** on the homepage. Or you can write to us at Aquapac International Limited, 7 Bessemer Park, 250 Milkwood Road, London SE24 0HG, United Kingdom.

What Must You Do To Keep The Warranty In Effect?

You will need to provide us with proof of the date of first purchase and your purchase price, so we recommend that you attach your receipt to this card. If you sell this product during the warranty period, you should give both the receipt and card to the new owner. Otherwise, he or she might be unable to get warranty service.

How Does State Law Relate To This Warranty?

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE OR BY TERRITORY.

INSTRUCTIONS

Warning Our warranty covers this Aquapac only, and not any items you may put inside it. We recommend that you insure the contents separately.

Waterproofness Our range has been tested to international waterproofing standards by the world-respected Engineering Research Centre at Imperial College, London. However, the waterproofness of your Aquapac depends on your closing and opening it carefully, and on it not being damaged either before or during use. Please follow all instructions carefully. For total peace of mind we recommend that you consult our detailed, helpful and regularly

updated customer care guides at www.aquapac.net. If you don't have access to the internet you can ask us or your local distributor for a printed copy.

Before Every Use Seal something worthless inside, then submerge in a basin to check the waterproofness.

Closing the Case Make sure that all parts are properly attached. Wipe away any grit or sand, which could hamper the seal. If your case seals with levers always turn them as far as they will go. They should lock smoothly, if not there may be something impeding the seal.

Opening the Case Never open your Aquapac in or under water. In order to stop any water getting in when you are opening it, first shake off any water then dry with a towel. Hold the case with the opening at the bottom as you open it.

Ongoing Care Our materials are strong but can still be punctured. Avoid sharp or abrasive objects and protect from impacts.

Materials Aquapacs are made from a variety of materials, mostly plastics which make them rustproof. These include TPU, ABS, nylon and polypropylene. Aquapac cases are 100% PVC-free.

Extreme Temperatures Although the case material has been UV-stabilized - which means that the plastic shouldn't be discoloured or broken down by sunlight - the Aquapac won't protect anything inside it from heat or sunlight. The soft case material is functional and flexible in air temperatures -40°C to +60°C (-40°F to +140°F), and water temperatures up to +40°C (+100°F).

Humidity and Condensation

In humid climates there will be moisture in the air sealed inside the case. Desiccant sachets will absorb the moisture, keeping the contents completely dry. We recommend use of desiccant sachets in all Aquapacs in humid climates. You can purchase spare sachets from www.aquapac.net.

Warning This is not a toy. It may contain small parts which may be a choking hazard to children under 3. Keep small parts away from children.
